

Willy Wiki

- Output of Willy Wiki:
 - [HTML Pages](#)
 - [PDF Document](#)

How the Wiki is setup using AsciiDoc with TravisCI and Github Pages

All **AsciiDoc** documents are exported to both **HTML & PDF**, this output is then published to the **gh-pages** branch by **Travis CI** which uses AsciiDoctor and Docker for converting.

- Demo:
 - [AsciiDoc source file](#)
 - [HTML output file](#)
 - [PDF output file](#)

This blog post describes the workflow how it is setup:
